To whom it may concern

World Anti-Doping statement (WADA)

Rousselot, hereby certifies that the following products:

Rousselot® Peptan® F, P and B

do not contain and have not been manufactured by a process involving any of the components listed in the 2020 Prohibited List of the World Anti-Doping Code (WADA) as well as substances placed on the 2020 WADA Monitoring Program (effective from 1 January 2020).

Further, Rousselot® products are compliant with European and US regulations on:

- **Heavy metals**, Regulation (EC) N° 853/2004 and further amendments, chapters 14 and 15 on gelatine and collagen and US Food Chemical Codex
- **Residues of pesticides** on foodstuffs of animal origin, Regulation (EC) 396/2005 and further amendments
- **Veterinary products, hormones, antibiotics and prohibited substances** (e.g. chloramphenicol, PCP), Regulations (EC) N°470/2009 and (EC) N°37/2010 and further amendments, US Food Chemical Codex and Code of Federal Regulations
- **Other food contaminants such as nitrates, dioxins, PCB, Melamine, Mycotoxins, Chloropropanol, 3-monochloropropane-1,2-diol (3-MCPD), Polycyclic Aromatic Hydrocarbons (PAH)**: Regulation (EC) N°1881/2006 and further amendments

The above mentioned are included in the Rousselot contaminant survey which carries out analyses on all types of products produced by Rousselot on a worldwide basis. Frequency of the analyses and tested materials depend on regulatory requirements and on a risk assessment made by Rousselot. The Rousselot contaminant survey goes far beyond current regulatory requirements and contributes to the high level of safety of Rousselot products.
